DETAILED'ACTION

Status of the Application

Receipt of the Response after Non-Final Office Action, the Amendment and Applicant's Arguments/Remarks, all filed 11/13/07 and the Information Disclosure Statement (IDS) filed 11/19/07 is acknowledged.

Upon further review and consideration the previous Restriction/Election requirement filed 04/05/07 has been <u>withdrawn</u>. Previously withdrawn claims 15, 17 and 23-32 are hereby rejoined and are being examined with the remaining elected claims (1-14, 16 & 18-22).

Upon further review and consideration, the previous Non-Final Office Action filed 08/10/07 has been <u>withdrawn</u>. The following are the new grounds of rejection:

Claims 1-32 are pending in this action. Claims 1, 6 and 20 have been amended. Claims 1-32 are being examined in this action. Claims 1-32 are rejected.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Application/Control Number:

10/715,219

Art Unit: 1618

Claims 1-32 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the active metabolite, O-desmethylvenlafaxine (ODV), does not reasonably provide enablement for any and all active metabolites of venlafaxine. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims. A review of the instant specification on pages 1-2 indicates that the only active metabolite of venlafaxine disclosed is ODV active metabolite. No additional active metabolite(s), or analog(s) or isomer(s) are disclosed therein. The only metabolite listed is ODV. Thus, the specification only supports the ODV active metabolite of venlafaxine, but not any and all active metabolites, analogs or isomers thereof.

Claim 2 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a controlled release composition having a maximum plasma concentration of venlafaxine obtained in less than four (4) hours, does not reasonably provide enablement for a venlafaxine controlled release composition devoid of the four-hour maximum plasma concentration. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims. A review of the instant specification on page 4 indicates that no evidence has been provided which would demonstrate that the formulation would not have the particular plasma level claimed (less than 4 hours). The specification only supports the maximum plasma concentration of venlafaxine to be obtained in less than four

Art Unit: 1618

hours. The limitations of claim 2 should be incorporated into claim 1 to render the claim

enabling.

Claim 6 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while

being enabling for an inert pellet having a diameter ranging from about 15 to about 60 mesh,

does not reasonably provide enablement for an inert pellet having a diameter mesh size other

than that being claimed in claim 6. The specification does not enable any person skilled in the

art to which it pertains, or with which it is most nearly connected, to make and/or use the

invention commensurate in scope with these claims. A review of the instant specification on

page 6 indicates that the only diameter mesh size provided is a diameter ranging from about 15

to about 60 mesh, such as is claimed in instant claim 6. No additional or varying diameter mesh

size ranges have been provided. The specification only supports the diameter mesh size of claim

6. The limitations of claim 6 should be incorporated into claim 1 to render the claim enabling.

Response to Arguments

Applicant's arguments filed 11/13/07 with respect to claims 1-14, 16 and 18-22 have been

considered but are moot in view of the new ground(s) of rejection.

Conclusion

-- No claims are allowed at this time.

Correspondence

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Humera N. Sheikh whose telephone number is (571) 272-0604.

The examiner can normally be reached on Monday, Tuesday, Thursday and Friday during

regular business hours. (Wednesdays - Telework).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Michael Hartley, can be reached on (571) 272-0616. The fax phone number for the

organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have any questions on access to the Private

PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
